Education

Pandit Deendayal Energy University B.Tech in Computer Engineering	July 2023 – May 2027 CGPA: 8.35/10
---	---------------------------------------

Experience

Web & Mobile Application Development Intern <i>Indian Institute of Teacher Education (IITE), Gandhinagar</i> Key Skills: Node.js, Express, MongoDB, Redis, JWT, Firebase, React, Tailwind CSS, Flutter, Socket.io	May 2026 – Aug 2026
• Built a full-stack University ERP for IITE using Flutter, React, Node.js, and MongoDB, serving Students, Faculty, and Administrators with attendance, timetable, announcements, and academic management modules. • Engineered secure JWT + RBAC authentication with Redis in-memory caching (3600s TTL), reducing database read load by 90–95% and delivering sub-10ms response times for frequently accessed academic data. • Improved API responsiveness by ~95% using BullMQ background workers for attendance processing and report generation, ensuring non-blocking operations and a seamless user experience. • Optimized MongoDB performance through compound indexing, atomic upserts, and Dockerized deployment with health monitoring, enabling up to 100× faster queries, preventing duplicate attendance records, and improving scalability and system reliability.	
Freelance Full-Stack Web Developer <i>Gandhinagar, India</i> Key Skills: React.js, Flutter, Tailwind CSS, GSAP, Node.js, Express.js, REST APIs, Redis, MongoDB, Firebase, MySQL, Git, GitHub, Vercel, Render, Razorpay.	Jan 2024 – Present
• Independently designed and shipped 4 production client websites – Three O’Clock Cafe, Vellarossa, Chef Choice Consultancy, and Strata Q – spanning hospitality and B2B consulting. • Engineered scroll-linked animation systems using GSAP ScrollTrigger, Framer Motion, and Lenis, synchronizing custom page-transition engines across React/Next.js SPAs. • Owned the full engineering lifecycle – architecture, deployment, domain configuration, and client-facing updates – generating Rs. 60,000+ in revenue across 4 delivered projects. • Solved recurring technical challenges independently – animation memory leaks, scroll/router race conditions, and hybrid video rendering logic – across every build.	

Projects

Arihant Store – E-Commerce & Inventory Management Platform <i>MERN Stack, Next.js, Redis, Razorpay, MongoDB, Vercel</i>	Mar 2026 – May 2026 arihant-seven.vercel.app
• Architected and developed a full-stack e-commerce platform connecting parents with partner schools for class-specific uniform purchasing, featuring secure authentication, inventory management, and online payments. • Reduced API response times by 80–85% using Redis in-memory caching, significantly lowering MongoDB read load for high-traffic product catalog requests. • Optimized database performance by up to 90% through MongoDB compound indexing and aggregation pipelines, enabling faster product search, analytics, and reduced server memory usage. • Improved frontend performance with Next.js App Router and image optimization, reducing JavaScript bundle size by ~40% and image payloads by ~65%, while strengthening application security using rate limiting, Helmet, and automated database cleanup.	

Technical Skills

Languages:	C++, JavaScript, Python, SQL
Frontend:	React.js, Flutter, Tailwind CSS, GSAP, HTML/CSS
Backend:	Node.js, Express.js, REST APIs, JWT Authentication
Databases:	MongoDB, MySQL, Redis, Firebase
Developer Tools:	Git, GitHub, Claude, Codex, Postman, VS Code, Vercel, Render
Core Competencies:	System Architecture, Performance Optimization, Concurrency Handling, API Design, Database Schema Design, Security (RBAC, Rate Limiting, Token-Based Authentication), Client & Stakeholder Management

Achievements & Activities

• Delivered 4 client projects end-to-end while independently owning development, deployment, and stakeholder communication across all engagements; participated in DA-IICT Hackout and L&T Hackathon, building functional prototypes under time-constrained, team-based conditions.
